HORIZONTAL BEAMS
TRAVI ORIZZONTALI

3 FACILE

Special Pergola System

IS COMPOSED BY ONLY THREE STRUCTURAL ELEMENTS:
E' COMPOSTA DA SOLI 3 ELEMENTI STRUTTURALI:

1

UNIVERSAL PROFILE:

The uprights, the horizontal beams as well as the horizontal supporting purlins are realized with the same aluminium profile, solid and sturdy.

PROFILO UNIVERSALE:

I montanti verticali, le travi orizzontali così pure i travetti portanti orizzontali sono realizzati da un unico profilo di alluminio solido e robusto.

2

UNIVERSAL BRACKET:

The universal bracket is located at the ends of each profile and enables the connection between the right angle profiles by means of proper connecting plates.

It's possible to connect the profiles by opposing the two universal brackets. The anchoring plates and the closing taps are connected to the universal bracket as well.

STAFFA UNIVERSALE:

La staffa universale è collocata alle estremità di ogni profilo e con l'ausilio di apposite piastrine permette la congiunzione fra i profili ad angolo retto.

Contrapponendo invece le due le staffe universali con viti è possibile unire i profili fra loro. Alla staffa universale vengono applicate inoltre le piastre di ancoraggio al suolo e tappi di chiusura profili.

3

quick connection clamp

aggancio rapido a morsa

HINGE:

The hinge enables to adjust the angle of the supporting purlins up to 20° and links the horizontal beams through a specially designed quick connection. The hinge can slide in both directions, longitudinal and transversal, inside the grooves of the universal profile before being fastened. This possibility enables the easy stretching of the canvas as well as the adjustment of the projecting part.

CERNIERA:

La cerniera, oltre a consentire l'inclinazione fino a 20° dei travetti portanti, ha la funzione di congiunzione, per mezzo di uno speciale aggancio rapido, alle travi orizzontali. La cerniera è caratterizzata dal fatto che, prima del serraggio, essa possa scorrere sia nel senso longitudinale che trasversale, all'interno di apposite scanalature ricavate nel profilo universale. Ciò facilita il tensionamento del telo e la variazione della parte a sbalzo.

Fasten the screws by a key to stop rotation.

Stringere le viti con una brugola per bloccare la rotazione.
